WHAT IS TRUSK BANK?

TRUSK is a combination of the first three letters from the name of **Mr. DONAL TRUMP (TRU)** and the last three letters from the name of **Mr. ELON MUSK (USK)**. The deeper goal of **TRUSK** is to honor the contributions of these two great men in the world. One is the most powerful person, and the other is the wealthiest, both of whom have made significant efforts in promoting, supporting, and protecting cryptocurrencies, particularly in their support for **Dogecoin**.

BANK represents the future direction – we aim to become a trusted platform for digital asset transactions, enabling people worldwide to easily access, store, and trade cryptocurrencies quickly and efficiently.

TRUSK BANK offers customers the opportunity to own special electronic shares designed for high applicability, allowing exchange or conversion into products and services such as satellite phones, electric vehicles, as well as shares in leading global companies like Tesla, Meta, Amazon, Visa, and Mastercard.

TRUSK BANK aspires to become a leading organization guiding the community, supporting, and promoting the development of Dogecoin across various fields globally.

02

BUSINESS STRATEGY

Trusk Bank has chosen **Dogecoin (DOGE)** as a strategic asset to accumulate and hold for customers in order to leverage the advantages of this digital asset within the digital financial ecosystem. With comprehensive support from top global billionaires, major reputable organizations using it in ATMs, and its high liquidity, low transaction fees, and widespread user community, **DOGE** offers easier financial access for its holders.

This strategy not only helps customers accumulate asset value over time but also allows them to use **DOGE** in real-world transactions, converting it into **Trusk Bank** shares or other valuable assets. By linking **DOGE** with its ecosystem, **Trusk Bank** aims to create a flexible, accessible, and sustainable financial model in the digital economy.

05

OPERATIONAL MODEL

- **TRUSK BANK** operates based on the specialized blockchain ledger technology **JIWE (JEWISH WISDOM)**, an advanced platform designed to ensure balance and sustainability across both large and small financial markets. This system helps manage transactions transparently, minimize risks, and optimize the flow of capital within the digital financial ecosystem.
- Thanks to **JIWE** technology, **TRUSK BANK** integrates the most advanced solutions to provide a flexible financial experience for users. Transactions are conducted at high speed, with low costs and maximum security, creating a stable and reliable financial environment for users.
- The operational model of **TRUSK BANK** not only supports the accumulation of digital assets but also opens up opportunities for trading and investing in shares of leading global corporations. By combining modern blockchain technology with long-term financial strategies, **TRUSK BANK** offers optimal, transparent, and secure investment solutions for all customers.

06

TOKENOMICS

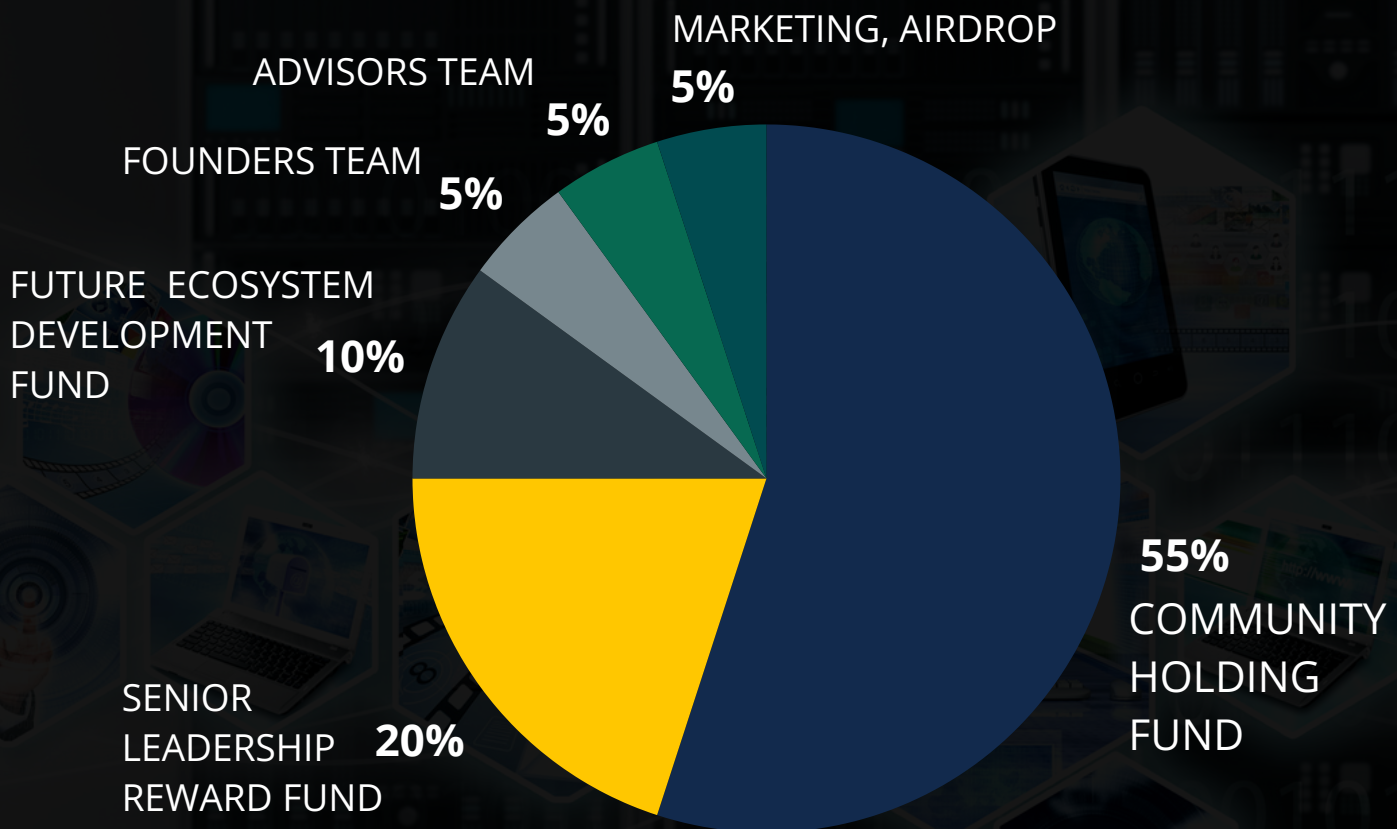

The **TOKENOMICS** of **TRUSK BANK** is defined as TP, an open-source Blockchain technology that requires mining to own. In the first phase, we launch a Beta version to build a community and accumulate the digital asset **Dogecoin**. Later, we use keys called **TRUSK** levels to apply the mining power to mine TP completely for free.

- **TRUSK BANK** operates through an integrated coin mining model, providing sustainable opportunities for participants to own digital assets. The mining mechanism of **TRUSK BANK** is designed around storing **Dogecoin (DOGE)** to mine TP, helping to increase asset value over time.
- The **TRUSK** ranking system is applied to encourage long-term participation: the higher the level, the faster the mining rate, helping users optimize profits. This creates an incentive to accumulate **DOGE** and increase mining leverage within the **TRUSK BANK** ecosystem.
- A special feature of **TRUSK BANK**'s Tokenomics is the re-holding mechanism. When users continuously re-hold and maintain assets, they will receive additional stablecoins in the future, generating a sustainable source of passive income. With this operation model, **TRUSK BANK** not only provides long-term value for investors but also ensures the stability and growth of the digital financial ecosystem.

TRUSBANK TOKENOMICS

TOTAL SUPPLY: 1,000,000,000 TP

- **COMMUNITY HOLDING FUND: 55%**
- **SENIOR LEADERSHIP REWARD FUND: 20%**
- **MARKETING, AIRDROP: 5%**
- **FOUNDERS TEAM: 5%** (Locked for 2 years, after 2 years, 10% can be vesting monthly)
- **ADVISORS TEAM: 5%** (Locked for 2 years, after 2 years, 10% can be vesting monthly)
- **FUTURE ECOSYSTEM DEVELOPMENT FUND: 10%** (Locked for 1 year, after 1 year, 10% can be vesting monthly)

07

DEVELOPMENT ROADMAP

1

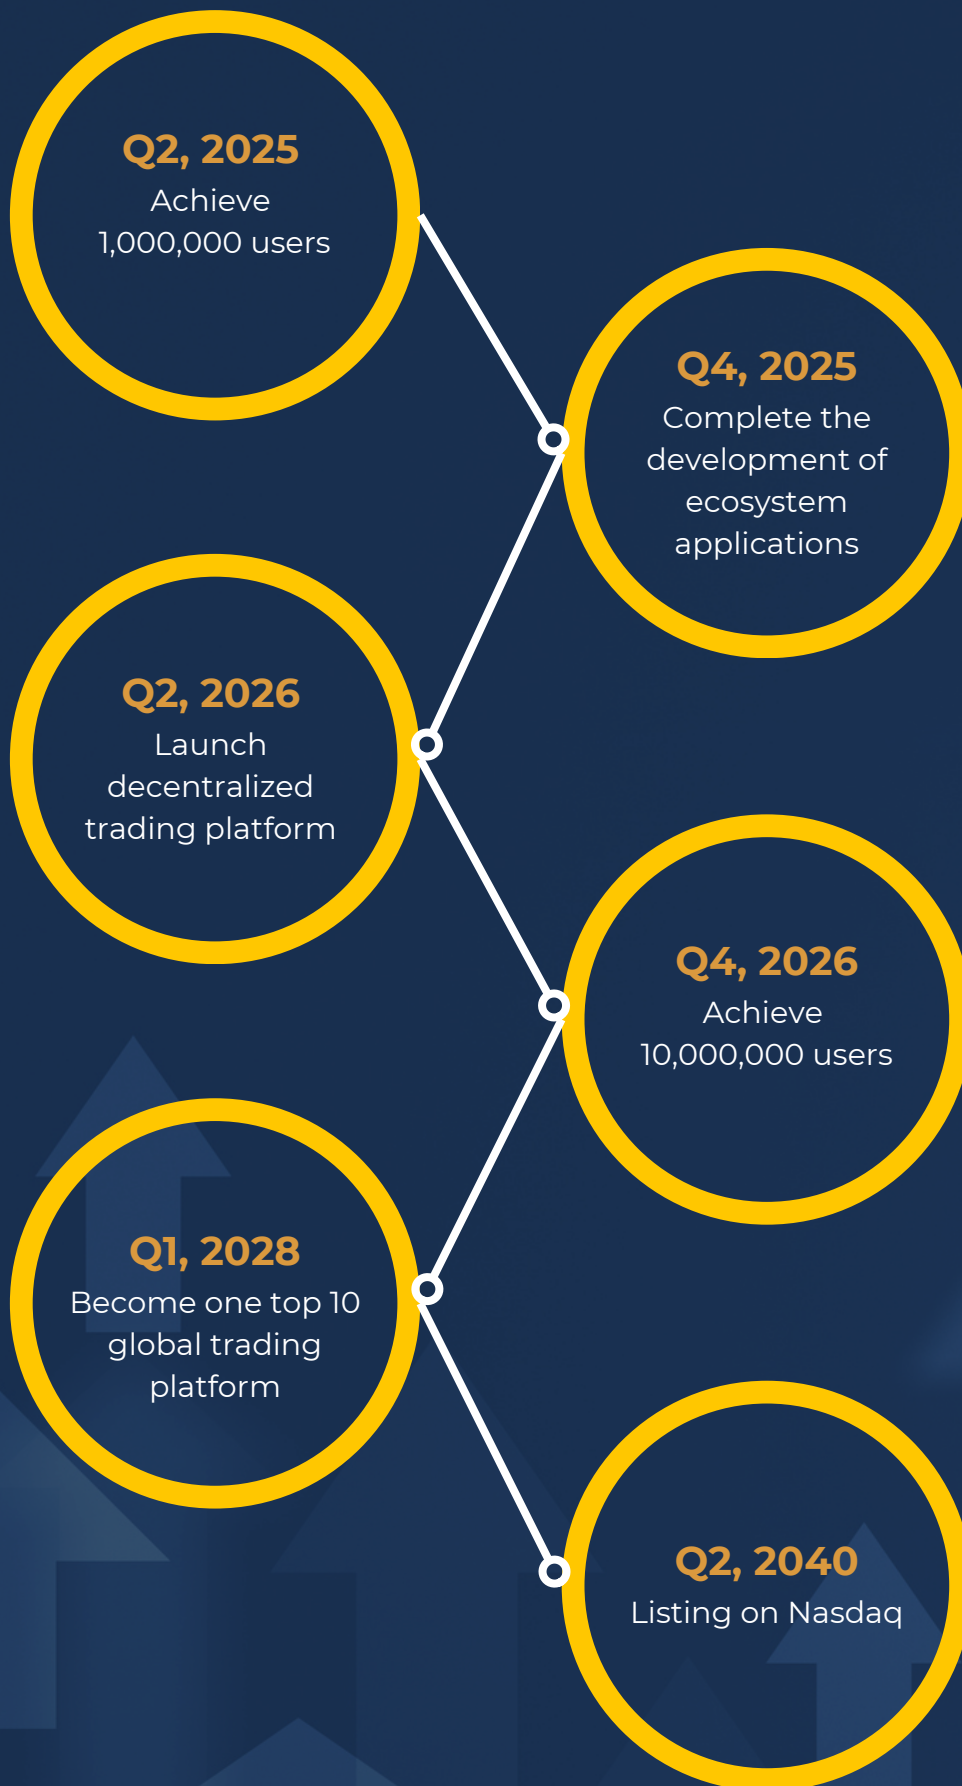

Trusk Bank is on its journey to becoming the leading multi-national trading hub, offering a comprehensive financial ecosystem with a focus on sustainable development. With a clear objective, **Trusk Bank** is not only a trading platform but also a space to connect and expand the community of **Dogecoin** enthusiasts and the company's **stablecoin** platform.

One of **Trusk Bank's** key development focuses is building, educating, and supporting the community, helping participants understand the value of **Dogecoin** and **stablecoins** in the digital financial platform. By providing knowledge, tools, and smart technological solutions, **Trusk Bank** creates an environment where users can develop effective and long-term digital asset holding strategies.

2

3

Aiming to become the leading platform for storing digital assets and **Dogecoin**, **Trusk Bank** is committed to being a "trusted address" for the global community. With support, clear direction, and advanced technology, **Trusk Bank** not only helps users accumulate assets securely but also opens up growth opportunities in the expanding digital economy.

08

COMPREHENSIVE ECOSYSTEM

Trusk Bank is working tirelessly to build and finish a comprehensive technology ecosystem with a full range of features designed to meet the financial and investment needs of users in the digital economy. The ecosystem of **Trusk Bank** is not just a digital bank but also includes many groundbreaking services and technologies, creating a diverse and flexible financial environment.

- **Trusk Bank** is a global payment and exchange platform, providing quick and secure opportunities for trading and exchanging digital assets for users worldwide.
- **Trusk Finance** is a profitable investment fund, a team dedicated to researching and analyzing potential profitable opportunities to help grow assets effectively and sustainably.
- **Trusk Wallet** is a digital asset storage wallet where users can easily manage and protect their digital currencies with high security and an optimized user experience.
- **Trusk Bank** is also researching and applying **AI technology** to enhance transaction efficiency, predict market trends, and support users in making smart investment decisions.
- In addition, **Trusk Bank** integrates other advanced technologies such as **IoT, GameFi, DeFi, DAO, DePIN**, and more to provide users with rich and creative experiences, opening up new opportunities to combine finance, technology, and investment.

Trusk Bank is building a complete ecosystem to deliver maximum benefits to the global user community.

09

D.O.G.E - U.S. GOVERNMENT EFFICIENCY SUITE

The emergence of **D.O.G.E (Department of Government Efficiency)** lead by Elon Musk has sparked much debate about whether its connection to the global digital economy is coincidental or intentional. As a technology and finance reformer, Elon Musk has long supported **Dogecoin (DOGE)** as a digital currency that offers practical value, low transaction costs, and high scalability. So, is the name **D.O.G.E** coincidentally aligned with **Dogecoin**, or is it part of a larger strategy within the digital economy ecosystem?

Looking deeper into the development of the digital economy, it is clear that **Dogecoin** is no longer just a "fun" cryptocurrency but is gradually becoming a widely accepted payment method. With Elon Musk previously pushing for **DOGE** to become a valid payment method on his platforms such as Tesla and X (formerly Twitter), the possibility of **DOGE** being integrated into U.S. government financial and transaction policies is entirely plausible.

D.O.G.E could be an experimental and strategic move aimed at promoting decentralized financial policies, increasing transparency, and enhancing efficiency in the public system. If this is indeed an intentional plan, the connection between **Dogecoin** and the U.S. government could mark a significant turning point, ushering in a new era where digital currencies are not just investment assets but also official financial tools in the global economy.
